Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "main-digit engaging portion **on the a tip**" is not understood.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2004-105260 in view of US 3867771 (Levine).

JP '260 teaches a foot-stimulation health promoting device (see the figures and the translation provided by the applicant) comprising a ring shaped main body equipped with an ankle portion (see figure 8 which shows the strap extending around the ankle), a main digit engaging portion (4), side lobe portion (1,2), a ring shaped transverse portion (elastic strap 8) and a ring shaped sub-digit engaging member (elastic strap 7) as claimed except for the both ends of the member 7 being sewn to the ring shaped main body. The elastic strap member 7 of JP '260 is sewn at one end but the other end is attached by hook and loop means (3a).

Levine teaches an elastic strap (18) wherein both ends of the strap are attached to the shoe. It would have been obvious to one of ordinary skill in the art to attached both ends of the strap 7 of Levine to the device, as taught by Levine, to facilitate attaching the strap to the person's foot. The side lobes (1,2) have a greater width than the other engaging portions of the device. With respect to the main-digit engaging portion being narrower than the ankle-engaging portion, it would be an obvious design choice to construct the ankle engaging portion of the device as taught above to be wider to facilitate engaging the ankle of the wearer.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

--“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
